

$\Lambda(1690) 3/2^-$  $I(J^P) = 0(\frac{3}{2}^-)$  Status: \* \* \* \*

The measurements of the mass, width, and elasticity published before 1974 are now obsolete and have been omitted. They were last listed in our 1982 edition Physics Letters **111B** 1 (1982).
